**Abaco Extends Successful SAP Mobile Technology
Relationship With OEM Agreement**

*E-Business and Mobile Business Solutions Providers Deliver Global Standards for
Mobile Business Applications via a Standard Mobile Platform*

Atlanta, Georgia – June 3, 2002 — Abaco, the leading provider of mobile enterprise business solutions today announced the extension of its collaborative development relationship with SAP AG (NYSE ADR: SAP) for mobile business technology. The companies have entered into an OEM agreement, whereby SAP will OEM part of Abaco's mobile enterprise framework within the SAP Mobile Engine. The announcement comes less than a year after SAP and Abaco entered into an OEM Agreement to provide middle tier mobile business solutions to SAP customers.

“The success of our relationship with SAP is most clearly evidenced, and ultimately measured, in the value we bring to customers,” said Fernando Alvarez, Chairman and CEO of Abaco. “Reports of return on investment and savings in application development and deployment costs and time have defined the success and have led to the deepening of our commitment. A typical mobile deployment may now take months to implement, rather than years, by saving time in application design and development, as well as implementation, since we are extending open industry standard protocols and technology, previously only available in the desktop world, into the mobile world.”

The OEM Agreement between Abaco and SAP AG for mobile computing reinforces Abaco as a strong mobile technology partner for SAP. It enables a standards-based mobile architecture which allows anytime, anywhere access to mission-critical data and business applications from a variety of wireless platforms in offline and online modes, and provides the associated tools needed to minimize the time, effort, and cost associated with mobile application development, deployment, and support.

“We are delighted to expand our relationship with Abaco, as we continue to leverage the market-leading functionality that their mobile enterprise framework has to offer”, said Dr. Peter Zencke, Executive Board Member, SAP AG. “With this agreement, we are extending benefits to the mobile market that enhance usage of functionality, increase end-to-end security on handheld platforms, and provide for an even more seamless connection in accessing third party legacy systems.”

About Abaco

Abaco is the leading provider of mobile business solutions. A proven leader in the industry, Abaco has more than twelve years of experience and 200 installations worldwide.

Abaco solutions leverage companies' existing enterprise infrastructure to empower their mobile workforces with mission critical information at the point of activity. Abaco addresses today's connectivity challenges for the mobile enterprise with solutions for disconnected, occasionally connected and connected environments. Its open, standards-based software architecture protects companies' initial investments in application development and deployment without compromising future technology advancement opportunities.

Abaco is headquartered in Atlanta, with offices in the United States and San Juan, Puerto Rico. Leading technology companies such as Microsoft and SAP recognize Abaco as a key partner in their mobile strategies. In 2000, Abaco was awarded a Total Solution Provider Award from AIM and *Business Solutions* magazine, and a Moby Award from Mobile Insights. Abaco investors include Benchmark Capital and Noro-Moseley Partners. For more information, go to www.abacomobile.com.
